

# OneLogin Multi-Factor Authentication & PGA.org

Proposed Soft roll-out: Feb. 2, 2022

- An optional sign up where member will be presented the option to sign up or bypass

Hard roll-out: TBD

- A mandatory sign up

## Keeping members secure!

---

What is OneLogin:

- OneLogin is a member account application. This is how you log into PGA.org. We're simply adding a multi-factor authentication layer similar to how you log into your bank account.
- This is to better protect your information and identity
- This Multi-Factor Authentication will provide an added layer of security by authenticating the user via:
  - Text Message - for cell phone users
  - Security Questions - for non-cell phone users
- Benefits of MFA:
  - Added layer of protection
  - Reduces security risks
  - Easy implementation
